

UWAIS WATKINS

New York, NY | 3478539372 | uwatki1@gmail.com | Website | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Junior Cloud/Cloud Operations professional with a B.S. in Information Technology, AWS Certified Cloud Practitioner, and 9 industry certifications. Hands-on experience building Terraform-managed AWS infrastructure, Azure/Wazuh security operations labs, Microsoft Entra automation, and Kubernetes workloads.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (S3, CloudFront, Lambda, API Gateway, DynamoDB, IAM), Azure, Terraform, Infrastructure as Code (IaC)

Automation & DevOps: Python, Git, GitHub Actions, CI/CD, Kubernetes, Helm, Argo CD, REST APIs

Systems & Networking: Linux, Windows, Windows Server, Active Directory, Microsoft Entra ID, TCP/IP, DNS, DHCP, VLANs

Monitoring & Security: Wazuh SIEM, Sysmon, File Integrity Monitoring (FIM), Vulnerability Management, CIS Benchmarks

TECHNICAL PROJECTS

AWS Serverless Infrastructure Deployment

github.com/waisyrr/AWS-Serverless-Infrastructure-Deployment | AWS, Terraform, GitHub Actions, Python

- Built a serverless AWS portfolio platform using Terraform to define 12 infrastructure resources across S3, CloudFront, Lambda, API Gateway, DynamoDB, and IAM; implemented a Python visitor-counter API with atomic DynamoDB updates and a push-triggered GitHub Actions deployment workflow.

Enterprise Azure SIEM/SOAR Security Operations Lab

github.com/waisyrr/Enterprise-Azure-Wazuh-SIEM-SOAR-Security-Operations-Lab | Azure, Wazuh, Active Directory, SOAR

- Built and documented a 3-VM Azure SOC lab with Active Directory, Wazuh SIEM, Windows/Linux telemetry, and an 8-stage SOAR workflow; analyzed and exported 482 security alerts and identified 7 vulnerability findings.
- Developed 15 Python automation utilities for SOC reporting, health monitoring, alert parsing, IOC enrichment, and incident reporting, generating structured CSV, JSON, and TXT outputs from Wazuh security events.
- Implemented evidence-backed monitoring for authentication failures, Sysmon processes, SSH brute force, file integrity monitoring, CIS checks, and vulnerability inventory; validated analyst-approved response orchestration and endpoint firewall-rule state.

Microsoft 365 / Entra ID Python Automation Lab

github.com/waisyrr/m365-entra-python-automation-lab | Python, Microsoft Graph, OAuth 2.0

- Developed 13 Python automation workflows using Microsoft Graph and OAuth 2.0 client credentials to automate Entra ID onboarding, offboarding, user lifecycle management, group administration, and CSV-based reporting across 30 directory users and 11 groups.
- Built user, department, group-inventory, and license-report exports to support directory administration and audit-oriented reporting.

Kubernetes GitOps Infrastructure Lab

github.com/waisyrr/kubernetes-gitops-infrastructure-lab | Kubernetes, Helm, Argo CD

- Deployed a 4-replica NGINX workload on Kubernetes using 7 declarative security and application resources, including namespace isolation, RBAC, ServiceAccount, ClusterIP networking, and a TCP/80 NetworkPolicy; packaged the workload as a reusable Helm chart and documented GitOps drift/self-healing validation.

PROFESSIONAL EXPERIENCE

IT Support & Systems Specialist | Pizza Sabbioni - Dubai, UAE

2025-2026

- Delivered Tier 1/Tier 2 support for Windows workstations, POS terminals, and network-connected peripherals, resolving hardware, software, TCP/IP connectivity, payment, and account issues across 10+ endpoint devices.
- Resolved approximately 180 technical support incidents per week, prioritizing rapid service restoration and escalating complex issues to third-party vendors when required.
- Troubleshooted local network connectivity, payment terminal functionality, self-service kiosks, and POS hardware across five payment platforms to minimize operational downtime.
- Administered a cloud-based POS and online ordering platform, managing data configurations for 700+ menu items and ingredient mappings while executing 10-15 monthly production updates without disrupting operations.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology

Western Governors University (WGU) | May 2026

AWS: Certified Cloud Practitioner

CompTIA: Security+ | Network+ | A+ | Project+ | Secure Infrastructure Specialist (CSIS) | IT Operations Specialist (CIOS)

IT Service & Linux: ITIL 4 Foundation | LPI Linux Essentials
